## **ESTABLISHMENT**

### **INTRODUCTION:**

**HOPE FOR CHILDREN** is a non-profit making NGO (non governmental organization) established in 2006 and registered under the TZ Society of Home Affairs. Our registration no. is 14151.

Hope for Children operates in the Masai-land around Arusha town.

### **MAIN OBJECTIVES:**

To facilitate that vulnerable children and orphans get an education and increase their livelihood options as they grow.

To decrease the number of street-children in Arusha, especially girls.

To establish income generating activities (IGA) among the widows who have a big burden of many children to take care of. Also to train about the environment in the villages such as harvesting rainwater, building water filters and latrine slabs.

To increase the awareness about HIV/Aids in the villages by training a group of people who then can give the education individually to the villagers.

The project will be a part of strengthening the relationship between the local church/FPCT, village government and the villagers.

### **ACTIVITIES:**

By conducting and implementing the above objectives Hope for Children focuses on the following activities:

Children at risk, either children who are in a process of becoming orphans or children who are unable to stay with their families, will be identified in the villages.

A selection will be made of the children with the most urgent needs. They will be taken care of in our centre in Arusha until a permanent solution is found. Fosterfamilies will take care of the children after the stay in our centre.

The children will be supported and follow-up visits will be made from our centre.

The children are given basic education in our centre before they can join the primary school of the government.

Courses will be given in the villages about IGA and HIV/Aids and environment skills like water cisterns for harvesting rainwater, water filters, keeping livestock and better farming skills.

### **TARGET GROUPS:**

Children at risk in villages surrounding Arusha, mainly girls but not excluding boys, between 5-12 years old of age and their families.

Choosing girls as the primary target group is relevant, considering that many NGOs in Arusha principally target boys because boys are easier to find.

Another factor of relevance is to choose girls between five and twelve years, because the older they get, the bigger the risk that they could have involved themselves in prostitution, which would require a special type of capacity from the project's side.

The families of the children are also a target group to the project, either the foster families that will require support or the existing families that will require another kind of assistance.

### **MISSION:**

Hope for Children as an organization focuses on poverty eradication among orphans and vulnerable children by improving their life in providing

- Rights to education
- Awareness of children's rights
- Establish foster homes or a better home situation where they are.

### **OUR DREAM AND VISION:**

A stable community at all levels; for education, physical and mental health.

A good nation which is empowered by economic, political, governmental and family strength.

The society can maintain their families and know their responsibility for the family structure.

People who know well the Word of God through some teaching.
